PaperCut™ MF

FEATURES

Centric Business Systems

![PaperCut MF]

Job Ticketing

Control and automate every kind of specialty printing – 3D printing, production printing, laser cutting, and anything else in a print room or FabLab – all in one place. For users, it's a simple and welcoming storefront for more finicky printing. And for operators, it's a powerful workflow tool to manage and fulfill jobs with ease.

What's a print room?
It can be any room with 1 or more MFDs production printers or both and can be referred to as a central reprographics department (CRD). Jobs are submitted to the room and attended to by someone other than the person who submitted the job.
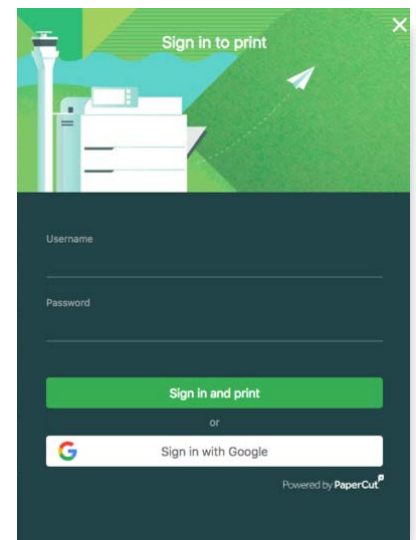

What's a FabLab?
They can be a room with a few 3D printers, or it may have upward of 20. They can also contain computer numerical control (CNC) and laser cutting machines. These labs offer rapid prototyping fabrication in many education environments.

Premier Partner
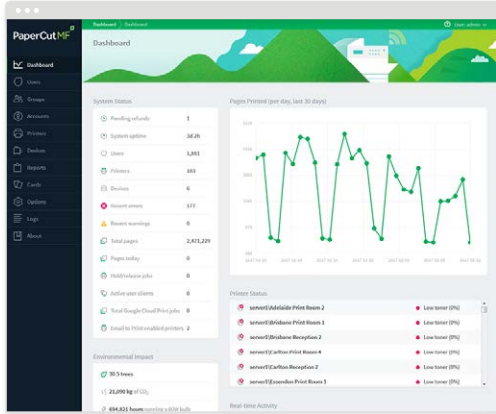

Google for Education

G Suite & Chromebook Integration

Empower easy printing from Chromebooks and quick access with "Sign In with Google". The new integration offers easy user management. With Google's new Secure LDAP feature, SysAdmins can sync users and groups right from G Suite.

Centric
Business Systems

Scan to Cloud Storage

Scan to Cloud Storage does exactly what it says on the box. It takes your scans and sends them to the cloud storage of your choice, including Google Drive, OneDrive and Dropbox. It takes minutes to setup in your print environment, needs minimal support, and gives users a friendly tap and scan workflow. Scan to Cloud Storage comes standard with PaperCut MF, giving you print management and cloud storage scanning in one easy solution.
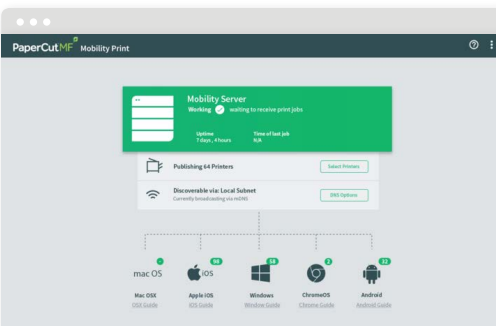

Web Based Administration

It's easy to manage all your users and devices with PaperCut MF. Log in to the web-based admin dashboard to see who, what, when, where and how they are printing. Securely configure devices, manage users, apply policies, setup quotas and enforce rules and restrictions.

Find-Me Printing

PaperCut MF's Find-Me Printing solves the problem of finding the closest printer from a long list of available printers. Send jobs to a virtual print queue then release from any multifunction printer. Simply authenticate at the device you want your job to be released from.

Mobility Printing

Empower users to discover and print to any printer with no tech assistance using PaperCut MF. Mobility Print tracks BYOD printing from any type of device and on all popular platforms (iOS, Android, Chrome OS, Windows or Mac OS). Allow users to release held jobs directly from their smartphone, tablet, laptop or Chromebook.

PaperCut MF

Complete control over
Print, Copy, Scan & Fax

Eliminate waste, encourage responsible behavior and make users and departments accountable for their print usage.

PaperCut MF includes embedded software that runs on your copier/MFD to enable tracking, control and secure print release directly from the device's panel. PaperCut MF is suitable for sites of any size, with a cross-platform and vendor-neutral approach to technology and device support. PaperCut's solutions are currently in use in over 50,000 sites worldwide and translated into 20 languages, making PaperCut MF a product you can trust with a high return-on-investment.

More Features

80+ Reports

With PaperCut MF's powerful reporting, run over 80 common reports from anywhere on the network with a standard web browser. Pre-built reports cover users, printers, shared accounts, groups and logs. Options include PDF reports, HTML and Microsoft Excel.

Rule Based Routing

Define and optimize your print policies with rule based printing. Support your organization in eliminating waste and changing user behavior or suggest more cost effective devices and options based on conditions.

Secure Print Release

PaperCut MF's Secure Print Release provides a simple solution that places jobs in a holding state until the user authenticates and releases the job at the printer. Requiring authentication before printing ensures only authorized users can print and collect documents. This is the perfect way to protect the integrity of sensitive information.

Campus Card Integration

Universities and colleges are big fans of campus card systems. Student IDs double as a payment method for food, parking and even books. Allow students to pay for printing with PaperCut MF-integrated campus cards.

Client Billing

Empower admins to allocate printing expenses to clients, projects or matters with Client Billing from PaperCut MF. Make it simple with direct account selection popups and more on all devices.

Powerful Job Scripting

Advanced scripting can be used to define and finely tune your printing policy, and support your organization in eliminating waste and changing user behavior.

Managing Quotas

Users can operate in either credit or debit, with defined account rules including how and how often an account is credited. Use network groups to define how additional quota/credit is assigned. Use network groups to define how additional quota/credit is assigned; for example, allow a specific group of users to accumulate their quota while others operate on a "use it or lose it" basis.

Change Settings at the Device

End-users can now edit print job attributes at the MFP prior to release. Users can also delete files created in error and switch to Shared Accounts. Show savings and encourage better behavior with additional updates at the touchscreen such as displaying cost and savings as changes are made to print jobs.

Integrated Scanning

With PaperCut MF System Administrators can assign user scan workflows to users and groups with the ease of deployment you've come to expect from PaperCut. Users get an integrated all-in-one interface along with pre-configured Scan Actions to on ramp into existing business systems. With a couple of clicks at the device, users can scan documents to predefined folders or email addresses.
